

Mutual funds offered by Vanguard 403(b) Services

This chart shows the Vanguard funds that are available for selection by a plan. We've grouped them into tiers to help make the choices easier to understand.

- **Tier 1.** A professionally managed, broadly diversified mix of investments that automatically rebalances as the retirement year approaches.
- **Tier 2.** A selection of low-cost Vanguard broad-market index funds and a money market fund that reduces active manager risk.
- **Tier 3.** Funds in each asset class, including active and specialty funds, that offer diversification but potentially higher share-price volatility.

Investment objectives, risks, charges, expenses, and other important information about a fund are contained in the prospectus; read and consider it carefully before investing.

The Prime Money Market Fund is only available to retail investors (natural persons). You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1 per share, it cannot guarantee it will do so. The fund may impose a fee upon the sale of your shares or may temporarily suspend your ability to sell shares if the fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Investments in Target Retirement Funds are subject to the risks of their underlying funds. The year in the fund name refers to the approximate year (the target date) when an investor in the fund would retire and leave the workforce. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in the Target Retirement Fund is not guaranteed at any time, including on or after the target date.

Mutual funds, like all investments, are subject to risks. Each LifeStrategy Fund invests in four broadly diversified Vanguard funds and is subject to the risks associated with those underlying funds.

Bond funds are subject to the risk that an issuer will fail to make payments on time, and that bond prices will decline because of rising interest rates or negative perceptions of an issuer's ability to make payments. Investments in bonds are subject to interest rate, credit, and inflation risk.

Investments in stocks or bonds issued by non-U.S. companies are subject to risks including country/regional risk and currency risk.

Funds that concentrate on a relatively narrow market sector face the risk of higher share-price volatility.

All investing is subject to risk, including the possible loss of the money you invest. Diversification does not ensure a profit or protect against a loss.
